Plant Science, 67 (1990) 259–261
Elsevier Scientfic Publishers Ireland Ltd.

SUBJECT INDEX

Volume 67 (1990)

Abscisic acid, *Hordeum vulgare*, catabolism, light, 135
Acetolactate synthase, feedback inhibition, *Datura innoxia*, cell culture variants, amino acids, sulfonylurea herbicides, chlorsulfuron resistance, 1
Acyltransferase, erucic acid, triacylglycerol, *Brassica napus* L., 21
Agrobacterium, *Daucus carota*, iodoacetamide, protoplast fusion, somatic hybrids, selection method, 227
Albumin, *Colocasia esculenta*, corm, storage proteins, differential expression, 39
Amaranthus, protoplasts, cytoplasmic calcium, indo-I, 125
S-(Aminoethyl)-L-cysteine, *Pennisetum purpureum*, embryogenic callus, 203
Amino acids, acetolactate synthase, feedback inhibition, *Datura innoxia*, cell culture variants, sulfonylurea herbicides, chlorsulfuron resistance, 1
Anaerobiosis, *Euglena gracilis*, glycolysis, fructose-2,6-bisphosphate, pyrophosphate, D-fructrose-6-phosphate 1-phosphotransferase, 161
Anethum graveolens, *Tanacetum parthenium*, *Mentha spicata*, cell cultures, secondary metabolism, buffered media, 107
Anther, *Lathyrus odoratus*, cellulase, β(1 : 4)4-glucan hydrolase, pollen, 169
Arginine decarboxylase, *Daucus carota* L., somatic embryogenesis, ethylene, silver nitrate, 89
Avocado sunblotch viroid, viroid cellular location, subcellular fractionation, *Persea americana*, 237

Black spruce, *Picea mariana*, somatic embryogenesis, protoplast regeneration, 115
Brassica, cruciferase, 11S globulin, rapeseed, subunit structure, 183
Brassica napus L., acyltransferase, erucic acid, triacylglycerol, 21
Buffered media, *Tanacetum parthenium*, *Mentha spicata*, *Anethum graveolens*, cell cultures, secondary metabolism, 107

Callus, *Hordeum vulgare L.*, embryogenesis, isoelectrofocusing, isoenzymes, organogenesis, 97
Catabolism, *Hordeum vulgare*, abscisic acid, light, 135
Cellulase, *Lathyrus odoratus*, anther, β(1 : 4)4-glucan hydrolase, pollen, 169
Cell cultures, *Tanacetum parthenium*, *Mentha spicata*, *Anethum graveolens*, secondary metabolism, buffered media, 107
Cell culture variants, acetolactate synthase, feedback inhibition, *Datura innoxia*, amino acids, sulfonylurea herbicides, chlorsulfuron resistance, 1
Cell elongation, light, phytohormones, inhibitors, phytochrome, 141
Chloroplast, dsRNA, pepper, 195
Chlorsulfuron resistance, acetolactate synthase, feedback inhibition, *Datura innoxia*, cell culture variants, amino acids, sulfonylurea herbicides, 1
Colocasia esculenta, albumin, corm, storage proteins, differential expression, 39
Corm, albumin, *Colocasia esculenta*, storage proteins, differential expression, 39
Cruciferase, *Brassica*, 11S globulin, rapeseed, subunit structure, 183
Cytoplasmic calcium, *Amaranthus*, protoplasts, indo-I, 125

Daucus carota L., somatic embryogenesis, ethylene, silver nitrate, arginine decarboxylase, 89
Datura innoxia, acetolactate synthase, feedback inhibition, cell culture variants, amino acids, sulfonylurea herbicides, chlorsulfuron resistance, 1
Daucus carota, *Agrobacterium*, iodoacetamide, protoplast fusion, somatic hybrids, selection method, 227
Differential expression, albumin, *Colocasia esculenta*, corm, storage proteins, 39
Direct gene transfer, synchronization, S-phase, M-phase, integration pattern, TBS, 63
dsRNA, pepper, chloroplast, 195

Elicitor(s), phosphonate, *Phytophthora cryptogea*, phytoalexins, *Vigna unguiculata*, 245
Embryogenesis, *Hordeum vulgare* L., callus, isoelectrofocusing, isoenzymes, organogenesis, 97
Embryogenesis, microspore, rice, haploid, plant breeding, 83
Embryogenic callus, *S*-(2-aminoethyl)-L-cysteine, *Pennisetum purpureum*, 203
Energy transfer, *Vitis vinifera* L., stem chloroplasts, ultrastructure, low temperature (77K) fluorescence, photosystems, 253
Epitope, immunoassay, isoperoxidases, *Spinacia oleracea*, 7
Erucic acid, acyltransferase, triacylglycerol, *Brassica napus* L., 21
Ethylene, *Daucus carota* L., somatic embryogenesis, silver nitrate, arginine decarboxylase, 89

Euglena gracilis, anaerobiosis, glycolysis, fructose-2,6-bisphosphate, pyrophosphate, D-fructrose-6-phosphate 1-phosphotransferase, 161

Feedback inhibition, acetolactate synthase, *Datura innoxia*, cell culture variants, amino acids, sulfonylurea herbicides, chlorsulfuron resistance, 1
D-Fructrose-6-phosphate 1-phosphotransferase, *Euglena gracilis*, anaerobiosis, glycolysis, fructose-2,6-bisphosphate, pyrophosphate, 161
Fructose-2,6-bisphosphate, *Euglena gracilis*, anaerobiosis, glycolysis, pyrophosphate, D-fructrose-6-phosphate 1-phosphotransferase, 161

Globulin (11S), *Brassica*, cruciferase, rapeseed, subunit structure, 183
β(1 : 4)-Glucan hydrolase, *Lathyrus odoratus*, anther, cellulase, pollen, 169
Glycolysis, *Euglena gracilis*, anaerobiosis, fructose-2,6-bisphosphate, pyrophosphate, D-fructrose-6-phosphate 1-phosphotransferase, 161
Granule bound starch synthase, potato, reversion, mutation, starch composition, 177
Growth regulators, *Pisum sativum*, meristem cultures, plant regeneration, 221

Haploid, microspore, rice, embryogenesis, plant breeding, 83
Hordeum vulgare, abscisic acid, catabolism, light, 135
Hordeum vulgare L., callus, embryogenesis, isoelectrofocusing, isoenzymes, organogenesis, 97

Immature ears, *Zea mays*, plant tissue culture, immature tassels, 211
Immature tassels, *Zea mays*, plant tissue culture, immature ears, 211
Immunoassay, epitope, isoperoxidases, *Spinacia oleracea*, 7
Indo-I, *Amaranthus*, protoplasts, cytoplasmic calcium, 125
Inhibitors, light, cell elongation, phytohormones, phytochrome, 141
Integration pattern, direct gene transfer, synchronization, S-phase, M-phase, TBS, 63
Iodoacetamide, *Daucus carota*, *Agrobacterium*, protoplast fusion, somatic hybrids, selection method, 227
Isoelectrofocusing, *Hordeum vulgare* L., callus, embryogenesis, isoenzymes, organogenesis, 97
Isoenzymes, *Hordeum vulgare* L., callus, embryogenesis, isoelectrofocusing, organogenesis, 97
Isoperoxidases, epitope, immunoassay, *Spinacia oleracea*, 7

Lathyrus odoratus, anther, cellulase, glucan hydrolase, pollen, 169
Light, cell elongation, phytohormones, inhibitors, phytochrome, 141
Light, *Hordeum vulgare*, abscisic acid, catabolism, 135
Low temperature (77K) fluorescence, *Vitis vinifera* L., stem chloroplasts, ultrastructure, photosystems, energy transfer, 253

M-phase, direct gene transfer, synchronization, S-phase, integration pattern, TBS, 63
Membrane transport systems, nitrate transport, proton electrochemical gradient, radiotracer methodology, 151
Mentha spicata, *Tanacetum parthenium*, *Anethum graveolens*, cell cultures, secondary metabolism, buffered media, 107
Meristem cultures, *Pisum sativum*, plant regeneration, growth regulators, 221
Microspore, rice, embryogenesis, haploid, plant breeding, 83
Mutation, potato, reversion, starch composition, granule bound starch synthase, 177

Nitrate transport, proton electrochemical gradient, radiotracer methodology, membrane transport systems, 151

Organogenesis, *Hordeum vulgare* L., callus, embryogenesis, isoelectrofocusing, isoenzymes, 97

Pennisetum purpureum, *S*-(2-aminoethyl)-L-cysteine, embryogenic callus, 203
Pepper, dsRNA, chloroplast, 195
Peroxidase, phenoloxidase, *Triticum aestivum*, 29
Persea americana, avocado sunblotch viroid, viroid cellular location, subcellular fractionation, 237
Petunia species, repeated DNA, phylogenetic relationships, satellite sequence, 57
Phenoloxidase, peroxidase, *Triticum aestivum*, 29
Phosphoglucomutase, photosynthesis, plant metabolism, starch, sucrose, 47
Phosphonate, *Phytophthora cryptogea*, elicitor(s), phytoalexins, *Vigna unguiculata*, 245
Photosynthesis, plant metabolism, phosphoglucomutase, starch, sucrose, 47
Photosystems, *Vitis vinifera* L., stem chloroplasts, ultrastructure, low temperature (77K) fluorescence, energy transfer, 253
Phylogenetic relationships, *Petunia* species, repeated DNA, satellite sequence, 57
Phytoalexins, phosphonate, *Phytophthora cryptogea*, elicitor(s), *Vigna unguiculata*, 245
Phytochrome, light, cell elongation, phytohormones, inhibitors, 141
Phytohormones, light, cell elongation, inhibitors, phytochrome, 141
Phytophthora cryptogea, phosphonate, elicitor(s), phytoalexins, *Vigna unguiculata*, 245
Picea mariana, black spruce, somatic embryogenesis, protoplast regeneration, 115
Pisum sativum, meristem cultures, plant regeneration, growth regulators, 221
Plant breeding, microspore, rice, embryogenesis, haploid, 83
Plant metabolism, photosynthesis, phosphoglucomutase, starch, sucrose, 47

Plant regeneration, *Pisum sativum*, meristem cultures, growth regulators, 221
Plant tissue culture, *Zea mays*, immature tassels, immature ears, 211
Pollen, *Lathyrus odoratus*, anther, cellulase, β(1 :)4-glucan hydrolase, 169
Potato, reversion, mutation, starch composition, granule bound starch synthase, 177
Proton electrochemical gradient, nitrate transport, radiotracer methodology, membrane transport systems, 151
Protoplasts, *Amaranthus*, cytoplasmic calcium, indo-I, 125
Protoplast fusion, *Daucus carota*, *Agrobacterium*, iodoacetamide, somatic hybrids, selection method, 227
Protoplast regeneration, black spruce, Picea mariana, somatic embryogenesis, 115
Pyrophosphate, *Euglena gracilis*, anaerobiosis, glycolysis, fructose-2,6-bisphosphate, D-fructrose-6-phosphate 1-phosphotransferase, 161

Radiotracer methodology, nitrate transport, proton electrochemical gradient, membrane transport systems, 151
Rapeseed, *Brassica*, cruciferase, 11S globulin, subunit structure, 183
Repeated DNA, *Petunia* species, phylogenetic relationships, satellite sequence, 57
Reversion, potato, mutation, starch composition, granule bound starch synthase, 177
Rice, microspore, embryogenesis, haploid, plant breeding, 83

S-phase, direct gene transfer, synchronization, M-phase, integration pattern, TBS, 63
Satellite sequence, *Petunia* species, repeated DNA, phylogenetic relationships, 57
Secondary metabolism, *Tanacetum parthenium*, *Mentha spicata*, *Anethum graveolens*, cell cultures, buffered media, 107
Selection method, *Daucus carota*, *Agrobacterium*, iodoacetamide, protoplast fusion, somatic hybrids, 227
Silver nitrate, *Daucus carota* L., somatic embryogenesis, ethylene, arginine decarboxylase, 89
Somatic embryogenesis, black spruce, Picea mariana, protoplast regeneration, 115
Somatic embryogenesis, *Daucus carota* L., ethylene, silver nitrate, arginine decarboxylase, 89
Somatic embryogenesis, suspension culture, sunflower, 73
Somatic hybrids, *Daucus carota*, *Agrobacterium*, iodoacetamide, protoplast fusion, selection method, 227
Spinacia oleracea, epitope, immunoassay, isoperoxidases, 7
Starch, photosynthesis, plant metabolism, phosphoglucomutase, sucrose, 47
Starch composition, potato, reversion, mutation, granule bound starch synthase, 177
Stem chloroplasts, *Vitis vinifera* L., ultrastructure, low temperature (77K) fluorescence, photosystems, energy transfer, 253
Storage proteins, albumin, *Colocasia esculenta*, corm, differential expression, 39
Subcellular fractionation, avocado sunblotch viroid, viroid cellular location, *Persea americana*, 237
Subunit structure, *Brassica*, cruciferase, 11S globulin, rapeseed, 183
Sucrose, photosynthesis, plant metabolism, phosphoglucomutase, starch, 47
Sulfonylurea herbicides, acetolactate synthase, feedback inhibition, *Datura innoxia*, cell culture variants, amino acids, chlorsulfuron resistance, 1
Sunflower, suspension culture, somatic embryogenesis, 73
Suspension culture, somatic embryogenesis, sunflower, 73
Synchronization, direct gene transfer, S-phase, M-phase, integration pattern, TBS, 63

Tanacetum parthenium, *Mentha spicata*, *Anethum graveolens*, cell cultures, secondary metabolism, buffered media, 107
TBS, direct gene transfer, synchronization, S-phase, M-phase, integration pattern, 63
Triacylglycerol, acyltransferase, erucic acid, *Brassica napus* L., 21
Triticum aestivum, peroxidase, phenoloxidase, 29

Ultrastructure, *Vitis vinifera* L., stem chloroplasts, low temperature (77K) fluorescence, photosystems, energy transfer, 253

Vigna unguiculata, phosphonate, *Phytophthora cryptogea*, elicitor(s), phytoalexins, 245
Viroid cellular location, avocado sunblotch viroid, subcellular fractionation, *Persea americana*, 237
Vitis vinifera L., stem chloroplasts, ultrastructure, low temperature (77K) fluorescence, photosystems, energy transfer, 253

Zea mays, plant tissue culture, immature tassels, immature ears, 211

Plant Science, 67 (1990) 263–264
